PROFESSIONAL SUMMARY

Motivated third-year Computer Science student at Haramaya University with strong proficiency in full-stack web development. Experienced in building responsive, feature-rich web applications using React, Node.js, Express.js, and MongoDB. Proven capability in delivering comprehensive digital solutions, highlighted by a full-stack E-Commerce platform featuring secure authentication, RESTful APIs, payment integration (Chapa), and administrative dashboards. Eager to bring technical problem-solving skills and a growth mindset to a dynamic software engineering team.

TECHNICAL SKILLS

Frontend Technologies:	React, HTML5, CSS3, JavaScript, Responsive Web Design, React Router, Axios
Backend & APIs:	Node.js, Express.js, RESTful APIs, Custom Middleware
Database & Storage:	MongoDB, Mongoose, Multer (File Uploads)
Authentication & Payments:	JSON Web Tokens (JWT), Chapa Payment Gateway
Development & Tools:	Git, GitHub, VS Code, Postman (API Testing & Verification)
Creative Skills:	Video Editing & Digital Content Creation

PROFESSIONAL EXPERIENCE / INDUSTRIAL PRACTICE

OICT Solutions — Addis Ababa, Ethiopia — Software Development Team Member

- Contributed to web application development and full-stack software engineering tasks in a team environment.
- Utilized **React, Node.js, Express.js, and MongoDB** to develop, integrate, and test RESTful APIs.
- Participated in debugging, user authentication workflows, database integration, and frontend-backend connectivity.
- Conducted API testing and validation using **Postman** and managed code version control via **Git/GitHub**.

FEATURED PROJECTS

Tech & Electronics E-Commerce Platform `MERN Stack • JWT • Chapa API • Multer` GitHub Code

- Engineered a full-stack e-commerce application tailored for browsing, managing, and purchasing tech electronic products.
- Developed secure user registration, login authentication, customer profiles, and **role-based access control** (Customer vs. Administrator).
- Implemented product cataloging, category management, inventory handling, dynamic shopping carts, and order history tracking.
- Integrated local image handling with **Multer** and processed secure online transactions via the **Chapa payment gateway**.
- Designed a comprehensive **Admin Dashboard** to oversee inventory, track user orders, monitor payments, and manage platform analytics.

EDUCATION

BSc in Computer Science — Haramaya University — Academic Standing: Above 75%
